# TERM - V

Name of the course : ESTIMATION	– II
Course code: CE505	Semester : FIFTH
Teaching Scheme	Maximum Marks : 125
	PA and End Examination Scheme
Theory: 2 hrs/week	Class test: 10 Marks
Tutorial: 0 hrs/week	Assignment / Quiz etc.: 10 Marks Attendance : 5 Marks Sessional : 25 Marks
Practical: 4 hrs/week	End Semester Theory Exam:75 Marks
Credit : 4	PA & End Semester Practical Exam:

## **Rationale:**

The subject of estimating is of prime importance, as the students are required to know the various aspects of rate analysis, types of estimates, details of specifications for arriving at a correct estimate of construction units for civil engineering projects

Course Object	tive :-					
Module/Unit	After completion of the course, students will be able to:					
UNIT - I	Analyze rates of various items of construction of simple civil engineering structures					
UNIT- II	Explain different types of estimation techniques and estimate cost of various items					
UNIT III	Consolidate ideas about specifications for various items of work as per IS specification					
UNIT - IV	Describe different forms of valuation and develop ideas to value real estate properties					
Pre-Requisite	Pre-Requisite :-					

Estimating I

MODULE / UNIT	Contents (Theory)	Hrs	Marks
UNIT - I	<b>1.0 RATE ANALYSIS</b> 1.1 Analysis of rates of brick work, plain cement concrete work, RCC work, doors, windows, plastering, cement concrete floor, white washing centering and shuttering, damp proof course coverage, carriage of materials, earth work for foundation and for cutting and filling of trenches	8	10
UNIT- II	<ul> <li>2.0 TYPES OF ESTIMATES</li> <li>2.1 Plinth area estimate, carpet are estimate, cube rate estimate, revised estimate, supplementary estimate, repair estimate.</li> <li>2.2 Bill of quantities, building cost index, annual repair estimate</li> </ul>	6	10
UNIT- III	<b>4.0 CONTRACTS &amp; TENDERS</b> 4.1 Definition, types of contracts – - lump sum contract, item rate contract, percentage rate contract, cost plus percentage, cost Plus fixed fee, cost plus variable percentage and cost plus variable fee contract, labour contract, demolition contract, fee contract, Target contract,	6	14

	<ul> <li>negotiated contract .</li> <li>4.2 Class of contractor, Registration of contractor.</li> <li>4.3 Filling the tender by contractor and points to be observed by him.</li> <li>4.4 Necessity of tender-sealed quotations and tenders. Tender notice- tender documents EMD and security deposit. Opening of tenders – Scrutiny of tenders – contract agreement – conditions of contract – execution of agreement</li> </ul>							
UNIT IV	<ul> <li>3.0 GENERAL AND DETAILED SPECIFICATION</li> <li>3.1 Preparation of detailed specification: earth work in excavation, first class brick work , wood work in doors and windows, CGI sheet and AC sheet roofing, rolling and consolidation of road metals, construction of cement concrete floor, RCC slab/box culvert, plastering, white washing, plain concrete, cement mortar, mosaic floor, lime concrete in terracing, centering and shuttering.</li> <li>3.2 Legal aspects of specification</li> </ul>	10	23					
UNIT - V	<ul> <li>4.0 VALUATION</li> <li>4.1 Definition, necessity of valuation, Definitions – cost price, value, difference between them, characteristics of value, factors affecting value.</li> <li>4.2 Types of value: - book value, scrap value, salvage, Value, speculative value, distress value, market value, monopoly value, sentimental value, factors affecting value .</li> <li>4.3 Depreciation, obsolescence, sinking fund; Methods of calculation of depreciation – straight line method, Sinking fund method constant percentage method quantity survey method.</li> <li>4.4 Computation of capitalized value, gross income, outgoing, net Income, years purchase. Types of outgoing and their percentages.</li> <li>4.5 Valuation of lands &amp; buildings, factors affecting their valuation, Book value method, replacement value method and comparison method. Use of valuation tables .deferred value of land.</li> <li>4.6 Fixation of rent as per PWD practice</li> </ul>	12	18					
	CLASS TESTS	3						
	Total	45 hrs	75					
	Tutorial Problems	L						
1. To	prepare a detailed estimate of an irrigation canal partly cutting and partly ba	nking						
2. To lat an	prepare a detailed estimate of a double storied RCC framed building v rines, septic tank, fencing wall with decorative finish (including plumbing, d timber works)	vith v sanita	verandah, ary, steel					
	prepare a detailed estimate of finishing items such as plastering, painting, va							
	prepare a supplementary estimate of a RC building for addition, alteration	n or o	deviation					
	om the original plan of the building after part execution prepare an estimate for annual repair of a RC building							
0. 10	6. To prepare an estimate for RC box culvert.							

6. To prepare an estimate for RC box culvert. Note: The above exercise will be given to the students as specific guided project work. They will be supplied with necessary drawing details. These exercises should be preferably run in parallel with the theoretical instruction

3. 4 5 6	Maintain quality of wat Describe the importance Manage the sewage sys Manage the sewage treat	ter e of sanitary system stem						
3. 4 5 6	Maintain quality of wat Describe the importance Manage the sewage sys Manage the sewage treat	ter e of sanitary system stem						
3. 4 5 6 Pre-Requisit	Maintain quality of wat Describe the importanc Manage the sewage sys Manage the sewage treater me :-	ter e of sanitary system stem	Marks					

			2
UNIT- II	<ul> <li>2.0 QUANTITY OF WATER:</li> <li>2.1 Water requirements and different uses of water</li> <li>2.2 Per capita demand, variation in demand and factors affecting demand</li> <li>2.3 Methods of forecasting population, Numerical problems using different methods</li> </ul>	2	2
UNIT - III	<ul> <li>3.0 SOURCES OF WATER:</li> <li>3.1 Surface sources- Lake, stream, river and impounded reservoir</li> <li>3.2 Underground sources- aquifer type &amp; occurrence-Infiltration gallery, infiltration well, springs, well-types, suitability</li> <li>3.5 Sanitary protection of wells and maintenance of well</li> </ul>	2	2
UNIT - IV	<ul> <li>4.0 CONVEYANCE OF WATER:</li> <li>4.1 Intakes- types, description of river intake, reservoir intake, canal intake</li> <li>4.2 Pumps for conveyance &amp; distribution types, selection, installation, capacity of pump, most economic diameter of pumping main</li> <li>4.3 Pipe materials-types, suitability, merits &amp; demerits of each type, selection of pipe material</li> <li>4.4 Pipe joints-necessity, types of joints, suitability, methods Of jointing</li> <li>[ Note: Detailed study covered under practical, hence students may be asked to prepare detailed sketches as home assignment ]</li> </ul>	2	4
UNIT - V	<ul> <li>5.0 QUALITY OF WATER:</li> <li>5.1 Impurities in water- organic and inorganic, classification</li> <li>5.2 Harmful effects of impurities</li> <li>5.3 Analysis of water- sampling and tests for physical, chemical and bacteriological quality ,significance of tests (<i>detailed methods of tests will be discussed in laboratory class</i>)</li> <li>5.4 Water quality standards for different uses</li> </ul>	3	4
UNIT - VI	<ul> <li>6.0 TREATMENT OF WATER:</li> <li>6.1 Flow diagram of conventional water treatment system</li> <li>6.2 Treatment process/units:</li> <li>6.2.1 Aeration:Necessity, types of aerators, essential features</li> <li>6.2.2 Plain Sedimentation:Necessity, working principles, Sedimentation tanks types, essential features, operation &amp; maintenance</li> <li>6.2.3Sedimentation with coagulation: Necessity, types of coagulants, determination of coagulant dose (<i>procedure of Jar test to be covered under practical</i>)</li> <li>Types, essential,operation of Flash Mixer, Flocculators and Clarifier</li> <li>6.2.4Filtration: Necessity, principles, types of filters</li> <li>Slow Sand Filter- essential features, operation, clearing &amp; maintenance</li> </ul>	5	7

		-	
	Rapid Sand Filter- essential features, operation, cleaning & maintenance, comparison with slow sandfilter, description & working operation accessories, head-loss		
	gauge etc.,		
	Pressure Filter essential features,		
	operation & maintenance, suitability of use		
	56.2.5 Disinfection: Necessity, methods of		
	disinfection, types of chemical disinfectants		
	Chlorination - free and combined chlorine demand, available		
	chlorine, residual chlorine, pre-chlorination, break-point		
	chlorination, super chlorination,		
	determination of chlorine dose (testingprocedure to be covere		
	d under practical), chlorinators- types, feeding		
	6.2.6 Miscellenous treatment methods:		
	Removal of iron & manganese-Necessity, working principles		
	Softening of water - Necessity, Methods of softening -		
	Lime soda process, Ion		
	exchange method, working principles		
	Removal of arsenic & fluoride-Necessity, working principles		
	6.3 Chemicals required in various treatment units, their		
	uses and feeding devices		
	6.4 Determination of dosage of chemical requirement for		
	coagulation, chlorination, (Jar test, Residual chlorine test to be discussed in laboratory)		
UNIT - VII	DISTRIBUTION SYSTEM:	6	5
	7.1 General requirements, types of distribution system-	0	U U
	gravity, direct and combined		
	7.2 Methods of supply- intermittent and continuous		
	7.3 Maintenance of required pressure in distribution		
	system head loss in system, calculation of size of pipes		
	-application of Hazen-William's formula, numerical		
	problems on determination of size of pipe 7.4 Storage- necessity, types- underground, ground level,		
	overhead reservoirs, suitability, accessories		
	7.5 Distribution system layout-types, comparison, suitability		
	7.6 Loss and wastage-causes, detection, remedial measures		
UNIT - VIII	APPURTENANCES IN DISTRIBUTION SYSTEM:	5	4
	8.1 Valves-types, features, uses, purpose-sluice valves,		
	check valves, air valves, scour valves		
	8.2 Definition of Fire hydrants, Water meters,		
	8.3 Various types of pipes and joints		
	<ul><li>8.4 Layout of water supply pipes</li><li>8.6 Installation of water supply plumbing system in a building</li></ul>		
	[Note: detailed study covered under practical. Students		
	may be asked to prepare sketches as home assignment]		
UNIT IX	RAIN WATER HARVESTING	2	2
	9.1 Rain water potential of Sikkim		
	9.2 Rain water harvesting concept,		
	<ul><li>9.3 Different process of rain water harvesting</li><li>9.4 Advantage and disadvantage of rain water harvesting</li></ul>		
	9.5 Capacity of storage tank for rain water harvesting		

UNIT X	<b>INTRODUCTION ON SANITARY ENGINEERING:</b> 10.1 Aims and objectives of sanitary engineering 10.2 Definition of terms related to sanitary engineering 10.3 Systems of collection of wastes- Conservancy and Water Carriage System- features, comparison, suitability	5	4
UNIT XI	QUANTITY OF SEWAGE: 11.1 Quantity of sanitary sewage- domestic & industrial Sewage, variations in sewage flow, numerical problem on computation quantity of sanitary sewage, Storm water flow-rational method of computation of flow 11.2 Computation of size of sewer, application of Chezy's formula, Limiting velocities of flow- self-cleaning and scouring	5	4
UNIT XII	<ul> <li>SEWERAGE SYSTEM</li> <li>12.1 Types of system, separate, combined, partially separate, features, comparison between the types, suitability</li> <li>12.2 Shapes of sewer, features, suitability</li> <li>12.3 Sewer materials- suitability, handling &amp; maintenance of stoneware, cast iron, cement concrete, asbestos cement, precast &amp; cast in situ sewer</li> <li>12.4 Laying of sewer-setting out sewer alignment, excavation, and supporting, checking the gradient, preparation of bedding, handling , lowering, laying and jointing, testing of sewer, backfilling, ventilation of sewer, cleaning</li> </ul>	5	5
UNIT XIII	<ul> <li>SEWER APPURTENANCES:</li> <li>13.1 Manholes and Lampholes- types, features, location,function, construction</li> <li>13.2 Inlets, Grease &amp; oil trap- features, location, function construction</li> <li>13.3 Storm regulator, inverted syphon-feature, location, function, construction</li> <li>13.4 Sewage Pumping-necessity, ejectors, location, component of pumping station, types of pumps and selection.</li> <li>13.5 Maintainance of sewers</li> </ul>	3	5
UNIT XIV	<b>SEWAGE CHARACTERISTICS:</b> 14.1 General importance, strength of sewage, Characteristics of sewage-physical, chemical & biological 314.2 Analysis of sewage sampling, tests for- solids, pH, dissolved oxygen, BOD, COD, Nitrogen ( <i>Detailed</i> <i>methods of test to be discussed in laboratory</i> ) 14.3 Bacteriology of sewage decomposition cycles of sewage- aerobic & anaerobic –C,N,S cycle		5
UNIT XV	<b>SEWAGE DISPOSAL:</b> 15.1 Disposal on land-sewage farming, sewage application and dosing, sewage sickness-causes & remedies 15.2 Disposal by dilution standards for disposal in different types of waterbodies, self purification of stream	3	5

UNIT XVI	SEWAGE TREATMENT		4	5
_ · _	16.1 Principles of treatment, Flow diagram of conve	entional		
	treatment			
	16.2 Primary treatment -necessity, principles, es	sential

## WATER SUPPLY & SANITARY ENGINEERING (Practical)

### **COURSE CONTENT:**

The students will perform the following tests/exercises to determine different parameters of given samples of water and waste water.

## UNIT\_TOPIC/SUB-TOPIC

Hrs. Total hrs.

SL.NO	NAME OF EXPERIMENT	HRS
1	Determination of Turbidity of a water sample using	2
	Turbidimeter/ Nephlometer/ Jackson's Candle Turbidimeter.	
2	Determination of PH of a water sample using (a) PH-meter	2
	b) colour comparator	
3	Determination of conductivity of a water sample using	2
	conductivity meter	
4	Determination of Acidity/ Alkalinity of a water sample using	2
	method of Titration	
5	Determination of Iron content of a water sample calorimetric	2
	method using Nesslers' Tubes	
6	Determination of chloride content of a water sample using	2
	method of titration	
7	Determination of Bacteriological quality of a water sample by Coliform Test	2
8	Determination of Coagulant (Alum) close requirement for a	2
	turbid water sample by method of Jar Test	
9	Determination of Dissolved Oxygen of a water sample,	2
	collected from the field, using Winkler's method	
10	Determination of total solids, suspended solids and dissolved	2
	Solids of a waste water sample by Gravimetric method	
11	Determination of Bio-chemical Oxygen Demand (BOD) of a	2
	waste water sample	
12	Study of different types of pipe joints, valves, water meters	2
13	Study of plumbing fixtures and fitting for water supply &	2
	sanitary arrangement	
14	Field visits to study:	2
	Water supply and Sewerage System of the Polytechnic	
	Campus, including a building	
	14.2 A water Treatment Plant	
	14.3 Waste water Treatment Plant	

Course code: CE502	Semester : Fifth	
Teaching Scheme	Maximum Marks : 125

Theory: 3 hrs/week	Class test: 10 Marks	
Tutorial: 0 hrs/week	Assignment / Quiz etc.: 10 Marks Attendance : 5 Marks Sessional : 25	
Practical: 2 hrs/week	End Semester Theory Exam:75 Marks	
Credit : 4	PA Practical : 00 Marks	

**Rationale:** Safety and durability of a structure depend on appropriate design, proper detailing and construction as per detailed drawing and specification. For this reason, 'Design and Detailing' is an important subject for Civil Engineering Diploma holders. They are most often asked to act as a supervisor in construction projects. In addition to this they may also require to work as a draftsmen responsible for preparing detailed drawing for construction sites. Diploma holders are also called upon to assist designers, suggest modifications for repair and renovation works and also to design simple structural elements. The subject attempts to cover the above aspects of civil engineering profession.

**Aim:** The subject aims to expose the civil engineering diploma students to design of simple structural elements and also to drawing structural details for construction.

Course Object	ctive :-			
Module/Unit	After completion of the course, students will be able to:			
	Effectively design different types of structural elements made construction materials	e of o	lifferent	
	Apply the basic principles governing the design in a proper manne	Standards in Civil		
	Apply the basic requirements envisaged in the relevant Indian s design to ensure safety and serviceability of structures	Standa	ırds in	
	Analyze and convey to others how success and failure of a major Engineering project can have a severe impact on the human societ			
	Translate theory to practice at the site including good quality detai fabrication	ling a	nd	
	Update oneself regularly with latest technological developments is the knowledge in this field is expanding in leaps and bounds	in this	field as	
Pre-Requisite	) 			
	Contents (Theory)	Hrs	Marks	

UNIT - I	<ul> <li>1.0 STRUCTURAL DETAILING</li> <li>1.1 Draw details of the following steel structures from the given line diagrams: <ul> <li>a) A steel roof truss with details of bolted or riveted and welded joints and connections including that of the steel column at base level with foundation (Plate I)</li> <li>b) A two storied steel building frame showing typical details of possible bolted and welded connections including that of column at base with the foundation (Plate II)</li> <li>1.2 Details of an underground RCC water tank (such as Sheet No. 19 of SP 34 or any other) - Plate III.</li> </ul> </li> <li>1.3 Combined detailed drawing of a two storied building with load-bearing wall spread footing and R.C. isolated column footing. (Plate IV).</li> </ul>	7	12
UNIT II	<ul> <li>2.0 DESIGN OF SIMPLE STEEL STRUCTURES</li> <li>2.1 State and sketch types of joints, explain and show failure of joints through sketches.</li> <li>2.2 State the permissible stresses in rivets and bolts; Design joints (excluding joints subjected to moments).</li> <li>2.3 Design determinate framed structure connections, solve problems for riveted and bolted connections.</li> <li>2.4 Welding: State and explain the uses and types of welding.</li> <li>2.5 State the permissible stresses in welding, minimum size of welding.</li> <li>2.6 Design simple welded connections for axial forces.</li> </ul>	5	10
UNIT- III	<ul> <li><b>3.0 TENSION MEMBERS</b></li> <li>3.1 State and sketch the common sections of tension members. State the permissible stresses for structural steel.</li> <li>3.2 Explain the net effective sectional area for angles and tees under different conditions, use structural steel section hand book, Design tension members (angle &amp; tubular sections) with detailing, and solve problems.</li> </ul>	4	10
UNIT - IV	<b>4.0 COMPRESSION MEMBERS</b> Distinguish between a strut and a column, short and a long column. Explain effective length, state maximum slenderness ratio of different compression members. Explain and perform design of axially loaded compression members (angle & tubular sections) as per IS 800, solve problems	4	10
UNIT - V UNIT - VI	DESIGN OF SIMPLE STEEL BEAMS 5.1 design of steel beam bending and shear DESIGN (AS PER IS:883-1970) OF TIMBER STRUCTURAL ELEMENTS FOR TENSION, COMPRESSION AND FLEXURE AS WELL AS	5	10 6

	DETAILING OF JOINTS		
UNIT-VII	<ul> <li>DESIGN OF FOOTINGS (RCC - LSM)</li> <li>7.1 Design of footings (RCC - LSM)</li> <li>7.2 State and sketch different types of footings</li> <li>7.3 Explain design loads for foundation design, basis of design of footings, soil pressure on foundation, design of independent footings, checking for development lengths, procedure for design of footings</li> <li>7.4 Design simple masonry foundation and R.C. slab foundation for a masonry wall</li> <li>7.5 Design isolated reinforced concrete square &amp; rectangular footings for given data &amp; draw detailed drawings Solve problems</li> </ul>	10	10
UNIT-VIII	CONCEPT OF SEISMICS IN PLANNING AND DESIGN OF BUILDINGS 8.1 Introduction of earthquakes. 8.2 Seismic Zoning, zones of different cities (IS:1893- PART 1 2016) 8.3 Planning a building in a seismic prone area, general structural arrangement and concept of tying the different elements (IS:4326)	5	7
	CLASS TEST	3

theory togeth Engineering (	er with practices of this subject will Construction Works, especially in the o	nical Engineering are equally important. The l help the practicing Civil Engineers in Civil design and construction of building foundation.	
<b>Course Objec</b>	tive :-		
Module/Unit	After completion of the course, students	will be able to:	
Module/Unit	After completion of the course, students Explain fundamentals of soil formati		
Module/Unit I.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde	on and types of soil ex properties and consistency limits of soil	
Module/Unit I. II.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde Classify soil according to grain size	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS	
Module/Unit I. II. III.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde Classify soil according to grain size and other specification specification	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil	
Module/Unit I. II. III. IV.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde Classify soil according to grain size and other specification specification Explain structure of different types o	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil ecting permeability	
Module/Unit I. II. III. IV. V.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde Classify soil according to grain size and other specification specification Explain structure of different types o Explain permeability and factors affe Determine seepage through soil form	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil ecting permeability	
Module/Unit I. II. III. IV. V. VI.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inde Classify soil according to grain size and other specification specification Explain structure of different types o Explain permeability and factors affe Determine seepage through soil form	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil ecting permeability ations f soil and conduct tests as per IS specification	
Module/Unit I. II. III. IV. VI. VII. VII.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inder Classify soil according to grain size and other specification specification Explain structure of different types o Explain permeability and factors affer Determine seepage through soil form Explain compaction characteristics o Develop the basic concept of consoli	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil ecting permeability nations f soil and conduct tests as per IS specification dation in soil	
Module/Unit         I.         II.         IV.         VV.         VI.         VII.         VIII.	After completion of the course, students Explain fundamentals of soil formati Explain different term related to inder Classify soil according to grain size and other specification specification Explain structure of different types of Explain permeability and factors affer Determine seepage through soil form Explain compaction characteristics of Develop the basic concept of consoli Define and explain different parametic	on and types of soil ex properties and consistency limits of soil distribution and consistency limits of soil as per IS f soil ecting permeability eations f soil and conduct tests as per IS specification	

UNIT	<b>Contents (Theory)</b>	Hrs	Marks
UNIT - I	<b>2.0 INTRODUCTION</b> 1.1 Definition of soil, formation of soil, residual and transported soil, Soil as a three phase system	2	3

			,
UNIT- II	<ul> <li>2.0 INDEX PROPERTIES</li> <li>2.1 Preliminary definition of water content, density, specific gravity, void ratio, degree of saturation, density index, numerical problems</li> <li>2.2 Determination of water content, specific gravity and particle size distribution of coarse and fine grained soil. Numerical problems</li> <li>2.3 Definition of Void ratio, density index, porosity, degree of saturation, air content,</li> <li>2.4 Unit weight of soil mass – bulk unit weight, dry unit weight, unit weight of solids, saturated unit weight, submerged unit weigh</li> <li>2.5 Specific gravity of soil solid - determination of specific gravity by pycnometer.</li> <li>2.5 Consistency of soil, stages of consistency, Atterberg's limits of consistency viz. Liquid limit, plastic limit and shrinkage limit, plasticity index, liquidity index, flow index, toughness index, activity number, shrinkage ratio, classification based on these index properties Numerical problems</li> </ul>	8	15
UNIT III	<b>3.0 CLASSIFICATION OF SOIL</b> 3.1 Identification and description of coarse and fine grained soils 3.2 Particle size classification, textual classification, HRB classification, unified soil classification , IS classification 3.3 Uniformity coefficient and coefficient of curvature, well graded and uniformly graded soils.	6	10
UNIT - IV	<ul> <li>4.0 SOIL STRUCTURE</li> <li>4.1 Particle arrangement in course grained, clay and composite soil</li> </ul>	2	4
UNIT V	<ul> <li>5.0 PERMEABILITY</li> <li>5.1 Definition of head, gradient</li> <li>5.2 Darcy's law, Validity of Darcy's law</li> <li>5.3 Laboratory and field determination of permeability</li> <li>5.4 Factors effecting permeability</li> </ul>	4	6
UNIT - VI	<ul> <li>6.0 SEEPAGE ANALYSIS</li> <li>6.1 Definition and concept of seepage flow</li> <li>6.2 Seepage through earthen structures, seepage velocity, seepage pressure, phreatic line, flow lines and equipotential lines, exit gradient, quick sand condition (no derivation)</li> <li>3.6 Flow net, characteristics of flow net, application of flow net (no numerical problems)</li> </ul>	4	5
UNIT VII	<ul> <li>7.0 COMPACTION</li> <li>7.1 Definition, purpose of compaction, field situations where compaction is required- maximum dry density, optimum moisture content, Zero air voids line.</li> <li>7.2 Standard proctor test &amp; Modified proctor test – test procedure as per IS code,</li> <li>7.3 Factors affecting compaction</li> </ul>	6	10

	<ul><li>7.4 Light and heavy compaction test as per IS specification</li><li>7.5 Field compaction methods - rolling, ramming, kneading&amp;</li><li>vibration and Suitability of various compaction equipment.</li></ul>		
UNIT - VIII	<ul> <li>8.0 CONSOLIDATION</li> <li>8.1 Principle of consolidation, spring-analogy method, Brief concept of compressibility and consolidation</li> <li>8.2 Terzaghi's one dimensional consolidation theory, its assumption and field of application, standard one dimensional consolidation test by consolidometer</li> <li>8.3 compression index, coefficient of compressibility, coefficient of volume compressibility, coefficient of consolidation and their interrelation (no deduction, only mathematical expression), swelling index</li> <li>5.4 computation of ultimate settlement – simple numerical problems</li> <li>8.4 difference between consolidation and compaction</li> </ul>	5	10
UNIT - IX	<ul> <li>9.0 SHEAR STRENGTH</li> <li>9.1 Definition of shear and shear parameters, Concept of shear strength of soil, Shear failure of soil, field situation of shear failure</li> <li>9.2 Components of shearing resistance of soil – cohesion, internal friction</li> <li>9.3 Mohr circle, unconfined compression test, direct shear test, UU test, numerical problems</li> <li>9.3 Introduction to Triaxial tests</li> </ul>	8	12
	CLASS TESTS	3	
	Total	48 hrs	75

Texts / Ref	ference		
Sl. No.	Name of Book	Author	Publishers
1.	Principles of Geotechnical Engineering	B. M. Das	Thomson
2.	Basic and Applied Soil Mechanics	Gopal, Ranjan	New Age International (P) Ltd.
3.	Soil Mechanics and Foundations, 2ed, w/CD	Budhu	Wiley India
4.	Soil Mechanics SI Version	Lambe	Wiley India
5.	Soil Mechanics & Foundation Engineering	Raj	Pearson
6.	Soil Mechanics & Foundations	B. C. Punmia, Ashok Jain & Arun Jain	Laxmi Publication
7.	Basic Soil Mechanics & Foundation	Alam Singh	CBS Publishers
8.	Soil Mechanics & Foundation Engineering	VNS Murthy	CBS Publishers

## GEO-TECHNICAL ENGINEERING – I (PRACTICAL)

Sl. No.	Experiment	
1.	Determination of water content and specific gravity of a given soil sample.	
2.	Determination of field density of a soil using core-cutter and sand replacement	
	method.	
3.	Determination of grain size distribution of a cohesionless soil sample by Mechanical	
	Analysis	
4.	Determination of grain size distribution of a fine grain soil sample by Hydrometer	
	analysis	
5.	Determination of consistency limits of a given soil sample by using Casagrande's	
	liquid limit device, cone penetrometer	
6.	Determination of coefficient of permeability: Constant head and variable head	
	method	
7.	Determination of maximum dry density and optimum moisture content by light and	
	heavy compaction	
8.	Conduction of Unconfined compression test, direct shear test	
9.	Demonstration tests in the laboratory — One dimensional consolidation test and	
	Triaxial test	

Prace	Practical :-		
SI. No	Skills to be developed		
1.	<ul> <li>Intellectual skills:</li> <li>1. Application of basic principles to classify soil, determine various parameter related to strength and consolidation and compaction characteristics of soil</li> <li>2. Analyze and solve problems of soil mechanics</li> </ul>		
2.	Motor skills- 1. Development of understanding for conduction of tests for determination of characteristics of soil		
3	<ul><li>Social skills-</li><li>1. Will learn to work with peer as group</li><li>2. Able to communicate with teachers and peers to clarify doubts.</li></ul>		

Course code:	CE510	Semester : FIFTH	
Teaching Scheme		Maximum Marks : 150	
		PA and End Examination Scheme	
Theory :	3 hrs/week	Class test: 10 Marks	
Tutorial:       1 hrs/week       Assignment / Quiz etc.:       10 Marks         Attendance :       5 Marks         Sessional :       25			
Practical :	2 hrs/week	End Semester Theory Exam:75 Marks	
Credit :	5	PA Practical: 25 Marks	
Rationale:		-	
airport.It is e	of highway engineering is very in essential for the students to get a of road constructions, maintenance,	-	and
Aim:			
bituminous p	lant mix surfaces, high type bitum	et coat, road-mix and intermediate type inous pavement and their design portland	
pavement des	rete pavement and their base coursign both flexible and rigid, highwa	rses, verified brick and block pavement, by maintenance and airport engineering.	
pavement des Course Objec	rete pavement and their base coursign both flexible and rigid, highwa	rses, verified brick and block pavement, by maintenance and airport engineering.	
pavement des	rete pavement and their base coursign both flexible and rigid, highwater tive :-	rses, verified brick and block pavement, by maintenance and airport engineering.	
pavement des Course Objec Module/Unit	rete pavement and their base coursign both flexible and rigid, highwater tive :- After the completion of course the Classify the different types of roat the society Identify the basic requirement	rses, verified brick and block pavement, y maintenance and airport engineering. e students will be able to ds and their necessity and benefits to rs, considerations, maintenance and

UNIT - I	1.0 INTRODUCTION	3	6
	1.1 Role of Transportation. Modes of Transportation, History	5	Ū
	of road development.		
	1.2 Classification of roads and pattern. Necessity and benefits		
	of roads.		
UNIT- II	2.0 HIGHWAY ALIGNMENT AND SURVEYS	11	15
	2.1 Stages of Engineering survey for highway location- map		
	study, reconnaissance, preliminary survey and final location		
	survey Drawings required for road project- Key map, Index		
	map, Preliminary survey plan and detailed		
	2.2. Alignment- basic requirements, factors affecting		
	alignment, special considerations for aligning hill roads.		
	2.3 Highway project – steps involved in a new project and in a		
	realignment project -2 Investigation for Road Project		
UNIT - III	3.0 GEOMETRIC DESIGN	12	14
	3.1 Cross sectional elements-Kerbs, road margin, road		
	formation, right of way, Shoulders		
	3.2 Camber- definition, purpose, types, IRC specifications.		
	3.3 Gradient- definition, types, IRC specification.		
	3.4 Sight distances- definition, types, IRC specification.		
	Horizontal curves, extra widening, transition curves, vertical		
	curves- summit and valley curves.		
	3.5 Super elevation-definition, formula for calculating super		
	elevation, minimum and maximum values of super elevation.		
UNIT - IV	4.0 TRAFFIC ENGINEERING	10	8
UNIT - IV	4.1 Traffic characteristic, Traffic surveys- volume study,	10	8
UNIT - IV	4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.	10	8
UNIT - IV	<ul><li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li><li>4.2 Traffic control devices-Road signs, marking, signals,</li></ul>	10	8
UNIT - IV	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> </ul>	10	8
UNIT - IV	<ul><li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li><li>4.2 Traffic control devices-Road signs, marking, signals,</li></ul>	10	8
UNIT - IV	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> </ul>	10	8
UNIT - IV	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade</li> </ul>	10	8
UNIT - IV	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> </ul>	10	8
UNIT - IV UNIT - V	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> </ul>	10	8
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> <li>5.0 ROAD CONSTRUCTION METHODS</li> <li>5.1 Types of road materials and Tests – soil, aggregates,</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> <li><b>5.0 ROAD CONSTRUCTION METHODS</b></li> <li>5.1 Types of road materials and Tests – soil, aggregates, bitumen, Cement Concrete. Test on soil sub grade- C.B.R. test,</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> <li>5.0 ROAD CONSTRUCTION METHODS</li> <li>5.1 Types of road materials and Tests – soil, aggregates, bitumen, Cement Concrete. Test on soil sub grade- C.B.R. test, Test on Aggregate – Los Angeles abrasion, impact, and shape</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> <li>5.0 ROAD CONSTRUCTION METHODS</li> <li>5.1 Types of road materials and Tests – soil, aggregates, bitumen, Cement Concrete. Test on soil sub grade- C.B.R. test, Test on Aggregate – Los Angeles abrasion, impact, and shape test. Tests on bitumen- Penetration, Ductility and Softening</li> </ul>		
	<ul> <li>4.1 Traffic characteristic, Traffic surveys- volume study, speed study, capacity, parking study, accident study.</li> <li>4.2 Traffic control devices-Road signs, marking, signals, traffic islands.</li> <li>4.3 Road intersections- Intersection at grade and grade separator intersections,</li> <li>4.4 Design factors of Highway Lighting</li> <li>4.5 Road accidents –causes and its prevention</li> <li>5.0 ROAD CONSTRUCTION METHODS</li> <li>5.1 Types of road materials and Tests – soil, aggregates, bitumen, Cement Concrete. ## 13.0 PRACTICAL: 30 hours

## UNIT TOPIC/SUB-TOPIC

\_\_\_\_\_ Hrs.<u>\_\_\_</u>

otal hrs.	
13.1	Determination of size and shape of road aggregates
13.2	Determination of crushing value of road aggregates
13.3	Determination of impact value of road aggregates
13.4	Determination of Los Angales Abrasion value of coarse road
aggregates	
13.5	Determination of C.B.R. value of subgrade soil
13.6	Determination of penetration value of bitumen
13.7	Determination of softening point of bituminous material
13.8	Determination of ductility of bitumen
13.9	Determination of Marshall stability value of bituminous
	Mixture

Name of the course : THEORY OF STRUCTURES			
Course code: CE409	Semester : FIFTH		
Teaching Scheme	Maximum Marks: 100		
	PA and End Examination Scheme		
Theory: 3 hrs/week	Class test: 10 Marks		
Tutorial: 1 hrs/week	Assignment / Quiz etc.: 10 Marks Attendance : 5 Marks		
Practical: 0 hrs/week	End Semester Theory Exam:75 Marks		
Credit : 4			
Rationale:			

Theory of structures is a very important subject for diploma holders in Civil Engineering. Many of them are entrusted with the responsibility to supervise constructions, make minor remedial changes in maintenance work, analyze simple structures etc. An adequate knowledge of behaviour of structures is very essential for developing self-confidence among the diplomats for delivering quality service of work. An understanding of 'why' part of structural behiviour and failures enables them to give adequate comparative weightage of heir attention to different components of construction supervision jobs.

The course content has been designed with a view to enabling students to solve problems of beams related to permissible stresses in bending and shear,

explain and apply the principle of superposition, analyze the determinate

trusses, apply the formulae for deflection to solve the problems of propped cantilever, understand and draw qualitatively the deflected shapes of beams and frames to identify the positions of main reinforcements and apply the concept of principal stresses and strains to explain and identify different types of cracks in reinforced concrete beams.

While teaching the deformation of indeterminate structures without going into theory and analysis, a teacher of the subject is advised to make use of indigenous flexible elastic model.

Course Ob	jective :-			
Module/U nit	After the completion of course the students will be able to			
1.	Calculate slope and deflection of simply supported and cantilever beam			
2.	Calculate BM and SF for propped cantilever, fixed and continuous beam			
3.	Solve problem by moment distribution method			
4	Analyse the different truss problem			
Pre-Requis	site :-			
Contents (	Γheory)	Hrs	Mar	

					ks
UNIT - I	<ul> <li>1.0 SLOPE AND DEFLECTION</li> <li>1.1 Calculation of slope and deflection in simply supported and cantilever beams with different loads by:</li> <li>a. Double integration method</li> <li>b. Macaulay's method</li> </ul>		8	7	
UNIT- II	II       2.0 PROPPED CANTILEVER BEAM         2.1       Concept of propped cantilever beam, S.F.D and B.M.D with point loads and udl         2.2       Slope and deflection for point loads and U.D.L			10	10
UNIT - III	<ul> <li><b>3.0 FIXED BEAMS</b></li> <li>3.1 Concept.</li> <li>3.2 Drawing of SFD an</li> </ul>	3.1 Concept.			10
UNIT - IV	<ul> <li>4.0 CONTINUOUS BEAMS</li> <li>4.1 Concept.</li> <li>4.2 Drawing of SFD and BMD for continuous beams loaded with point load and udl using Claypeyron's theorem of three moments.</li> </ul>			8	12
UNIT - V	V5.0 INTRODUCTION TO MOMENT DISTRIBUTION METHOD5.1 Sign convention, carry over factor, stiffness factor, distribution factor.5.2 Numerical problems.			6	15
UNIT - VI	6.0 APPLICATION OF MOMENT DISTRIBUTION METHOD           6.1 Single stored single bay symmetrical portal frames, SF and BM diagrams			10	10
UNIT - VII	<ul> <li>7.0 TRUSS</li> <li>7.1 Introduction, Definition, different types of truss.</li> <li>7.2 Advantages and disadvantages.</li> <li>7.3 Analysis of truss- Method of joints, method of section, graphical method.</li> <li>7.4 Difference between frame and truss.</li> </ul>		10	10

#### **Rationale:**

The diploma-holders in Civil Engineering, many a times, are involved with project work at site as a supervisor for managing the construction of the project. Major works involved in that case rull and regulation at site ,safety related to equipments and human life, construction related procedure and some measurement and analysis of data also their other related components. They are also expected some industrial visits for gathering knowledge about the different stages of the constructionand management process at the site.

Course C	Dbjective :-		
Module/	After completion of the course, students will be able to:		
Unit			
1.	Describe different process of construction management and their interrelated		
	terms		
2.	Handle the construction related machine/ equipment.		
3.	Aware cause and effect of accident and safety measure in construction works		
4	Describe different rules and regulation related construction works		
5	Explain the quality control of construction works		
6			
Pre-Requ	isite :-		
Contents	(Theory) Hrs Marks in %		

UNIT- I	1.0 INTRODUCTION	3	5
	1.1Aims & objectives of construction management		
	1.2 Functions of construction management		
	1.3 The construction team components-owner, engineer, architect,		
	contractor-their functions and interrelationship and jurisdiction		
	1.4 Resources for construction management, men, machines,		
	materials, money		
	1.5 Collecting an estimate from P.W.D.		
UNIT - II	2.0 CONSTRUCTIONAL PLANNING:	8	15
	2.1 Importance of constructional planning		
	2.2 Developing work break down structure for construction works		
	2.3 Construction planning stages- Pretender stage, Post- tender		
	stage		
	2.4 Construction scheduling by bar charts preparation of bar		
	charts for simple construction works		
	2.5 Preparation of schedules for labour, materials, machinery,		
	finance for small works		
	2.6 Limitations of bar charts		
	2.7 Construction scheduling by network techniques. Definitions		
	of terms- PERT and CPM techniques, advantages and		
	disadvantages of two techniques, network analysis, estimation of		
	time and critical path, application of PERT & CPM techniques in		
	simple construction works		
UNIT -	3.0 SITE MANAGEMENT	3	5
III	3.1 Factors influencing selection, design and layout of temporary	5	5
111	facilities and services at construction site		
	3.2 Principles of storing materials at site		
	3.3 Location of equipment Organizing labour at site		
	che Zoeunon of equipment ofgunzing tuoour ut site		
UNIT -	4.0 SAFETY IN CONSTRUCTION WORKS:	5	14
IV	4.1 Importance of safety		
	4.2 Causes and effects of accidents in construction works		
	4.3 Safety measures in work sites for-excavation, scaffolding,		
	formwork, fabrication and erection, demolition		
	4.4 Development of safety consciousness		
	4.5 Safety legislation-workmen's compensation act, contract		
	labour act		
UNIT - V	5.0 DISPUTES:	3	5
	5.1 Nature of disputes between contractor and owner		
	5.2 Causes of disputes and claims		
	6.3 Arbitration-procedure, criterion for arbitrator, conditions for		
	arbitration.		
UNIT -VI		3	6
	6.1 Principles of inspection - enforcement of specifications -		
	stages of inspection and quality control for earth work, masonary,		
	RCC, sanitary and water supply services		
	6.2 Quality standards -during construction, after construction		
	6.3 Methods of testing-during construction, after construction,		

	Destructive & non-destructive methods			
	Guest lecture on construction managem	nent	2	
Total			32 hrs	50

# TERM – VI

### ENGINEERING ECONOMICS AND ACCOUNTANCY

L T P 3 0 0

Total marks: 100

**Theory:** End Term Exam: 75 P.A.: 25

Curri. Ref. No.: G303

## RATIONALE

Credit: 3

The knowledge of Engineering Economics and Accountancy is needed by personnel dealing with the cost of products of any kind related to quality and standards of production including its financial control. Engineers / Technicians, in general, need to know the cost of the final products for marketing purposes. The knowledge of Economics as well as Accountancy is required by all people dealing in any business or enterprise.

This particular subjects deals in basic concepts of economics, production of commodities, different types of industries, market forms, objective of economic planning, concept of value of money, causes of unemployment, industrial policy, business transaction and accountancy, maintenance of cash and balances, receipt and expenditures and final accounts.

## **DETAIL COURSE CONTENT**

### **THEORY:**

UNIT	TOPIC	Lecture Hrs.		
1.0	INTR	ODUCTION	1	
	1.1	Introduction to Economics and its Utility of study		
	1.2	Importance of the study of Economics		
2.0	0 BASIC CONCEPTS OF ECONOMICS 3			
	2.1	Definition of Utility, Consumption, Want, Value, Price, Goods, National Income.		
	2.2	Classification of goods, characteristics and classification of wealth.		
	2.3	Basic Laws of demand and supply.		
	2.4	Concept and Measurement of Elasticity of demand		
3.0 PRODUCTION		3		

**Total Contact hrs.:** Theory: 45 Tutorial: 0 Practical: 0

	3.1	Meaning and factors of production.	
	3.2	Land, Labour, Capital and Organisation	
	3.3	Formation of Capital, Break even chart-its uses.	
4.0	SCAI	LE OF INDUSTRIES	2
	4.1	Definition, advantages and disadvantages of small, medium and large scale production	
	4.2	Internal and External Economies	
5.0	MAR	KET FORMS	3
	5.1	Definition and types of Markets in respect of present trends.	
	5.2	Features of Perfect, Imperfect and monopoly markets.	
	5.3	Price determination under perfect competition and monopoly	
6.0	ECO	NOMIC PLANNING	3
	6.1	Features of Under-developed and Developing Countries.	
	6.2	Meaning, objectives and needs of planning.	
	6.3	Introduction to industrial development in India during the five year plans.	
7.0	MON	IEY	3
	7.1	Meaning and functions of Money	
	7.2	Introduction to the concept of the value of money	
	7.3	Meaning of Inflation, Deflation, Stagnation.	
8.0	UNE	MPLOYMENT	2
	8.1	Meaning, types and causes of Unemployment	
	8.2	Unemployment problems in India	
9.0	INDU	JSTRIAL POLICY	3
	9.1	Current Industrial Policy	

	9.2	Industrial licensing Policy, De-licensing	
	9.3	Monopolistic and Restricted Trade practices (MRTP) Foreign Exchange Regulation Act (FERA).	
10. 0	BUS	SINESS TRANSACTIONS AND ACCOUNTANCY	5
	10.1	Transactions and classifications, need and objectives of proper records including double entry system.	
	10.2	Classification of Accounts and its description	
		(in respect of real accounts, personal accounts and nominal accounts)	
	10.3	Debit and credit concept; golden rules of debit and credit.	
	10.4	Objectives and principles of double entry book-keeping.	
11.0	BOO	KS OF ACCOUNTS	2
	11.1	Journal and Ledger, their sub-divisions; posting from journals to ledger.	
	11.2	Balancing of Accounts	
12.0	CASI	H BOOK	2
	12.1	Objective of Cash Book (in respect of all kinds of Cash transactions)	
	12.2	Single column, double column and triple column cash book	
	12.3	Imprest system of Petty Cash Book.	
13.0	TRIA	AL BALANCE	2
	13.1	Objective, Preparation, errors and rectification (in respect of balance of accounts for the total period).	
14.0	FINA	L ACCOUNTS	5

	14.1	Steps of preparing accounts; Trading Account; Profit and Loss Account		
	14.2	Revenue and Depreciation adjustment		
	14.2	Introduction to balance sheet		
15.0	-	TAL AND REVENUE EXPENDITURE RIBUTION	3	
	15.1	Receipts and payments		
	15.2	Income and Expenditure differences		
16.0	MEA	NING AND PURPOSE OF COSTING	2	
	16.1	Elements of Cost-Analysis and classification of expenditure for cost accounts.		
	16.2	Cost Control – Prime cost, Overhead cost, and Indirect materials and tools.		
17.0	ELEC	CTRONICS COMMERCE – MEANING – SCOPE	1	
	17.1	Accounting Software – Tally latest version

### RATIONALE

Management is the integrated component of all areas of technological courses as recognized across the world. Technicians or supervisors coming out of the system hence need to study the basics components of the management relevant to them. Principals of management will enable them to apply basic knowledge of management in their field of work. Keeping with this in mind necessary content details of the course on Principles of Management has been developed. With the assumption that, it will develop some management foundation to the diploma students.

#### **DETAIL COURSE CONTENT**

### **THEORY:**

UNIT TOPIC / SUB-TOPIC	Lecture Hrs.
FRAMEWORK OF MANAGEMENT	8
1.1 Nature of management	
1.2 Development of management thoughts	
1.3 Management and process skills	
2.0 PLANNING	9
2.1 Fundamentals of planning	
2.2 Planning premises and forecasting	
2.3 Decision making	
2.4 Mission and objective	
3.0 ORGANIZING	10

3.1 Fundamentals of organizing

Curri. Ref. No. G305

**Theory:** End Term Exam: 75 P.A.: 25

- 3.2 Design of organization structure
- 3.3 Forms of organization structure
- 3.4 Power and authority
- 3.5 Authority relationship

### 4.0 STAFFING

8

Curri. Ref. No.:G306

### RATIONALE

Knowledge in behavioural principles in an organization is an important requirement because concepts such as work motivation, behavioural patterns of individuals as also those of group of individuals etc are intimately related to it. Organizational Behavioural principles, its scopes, applicability etc. are therefore important to know by the students irrespective of the branch of specialization. Based of the above facts following content details of the subject on Organizational Behaviour has been suggested.

### RATIONALE

Management of Environmental Degradation as also its control using innovative technologies is of prime importance in the times we are living in. Since the days of the famed Rio Summit (1992) awareness about degradation of environment we live in an its management through participation of one and all has literally blossomed into a full fledged movement of universal importance. Technically qualified people, such as the Diploma Engineers, should not only be aware about new technologies to combat environmental degradation at their disposal but also various aspects of environment, ecology, bio-diversity, management, and legislation so that they can perform their jobs with a wider perspective and informed citizens. This course can be taken by all diploma students irrespective of their specializations.

### **DETAILED COURSE CONTENT**

#### 3.0 NATURAL RESOURCES

- 3.1 Definition of Natural Resources
- 3.2 Types of Natural Resources
- 3.3 Quality of life
- 3.4 Population & Environment
- 3.5 Water Resources
  - Sources of Water
- 3.6 Water Demand
- 3.7 Forest as Natural Resource
  - Forest and Environment
  - Deforestation
  - Afforestation
  - Forest Conservation, its methods
- 3.8 Land
  - Uses and abuses of waste and wet land

#### 4.0 GLOBAL ENVIRONMENTAL ISSUES

9

5

- 4.1 Introduction
- 4.2 Major Global Environmental Problems
- 4.3 Acid Rain
  - Effects of Acid Rain
- 4.4 Depletion of Ozone Layer
  - Effects of Ozone Layer Depletion
- 4.5 Measures against Global Warming
- 4.6 Green House Effect

#### 5.0 ENVIRONMENTAL POLLUTION

- 5.1 Introduction
- 5.2 Water Pollution
  - Characteristics of domestic waste water
  - Principles of water treatment
  - Water treatment plant (for few industries only- unit operations & unit processes names only)
- 5.3 Air Pollution
  - Types of air pollutants
  - Sources of Air Pollution
  - Effects of Air Pollutants
- 5.4 Noise Pollution
  - Places of noise pollution
  - Effect of noise pollution

### 6.0 CLEAN TECHNOLOGY

- 6.1 Introduction to Clean Technologies
- 6.2 Types of Energy Sources
  - Conventional Energy sources

### 9

6

- Non-conventional sources of Energy
- 6.3 Types of Pesticides
- 6.4 Integrated Pest Management

# 7.0 ENVIRONMENTAL LEGISLATION 3

7.1 Introduction to Environmental Legislation7.2 Introduction to Environmental Laws

### 8.0 ENVIRONMENTAL IMPACT ASSESSMENT 3

- 8.1 Introduction to Environmental Impact Assessment
- 8.2 Environmental Management (elements of ISO 14001)
- 8.3 Environmental ethics

### SUGGESTED IMPLEMENTATION STRATEGIES:

The teachers are expected to teach the students as per the prescribed subject content. This subject does not have any practical but will have only demonstration and field visit as stated. The students will have to prepare report of the site visit.

### SUGGESTED LEARNING RESOURCES:

(a) Reference Books:

S. No.	Title	Author, Publisher, Edition & Year
1.	Environmental Engineering	Pandya & Carny,
		Tata McGraw Hill, New Delhi

Contents (Theo			Hrs	Marks	
UNIT- I	<b>1.0 INTRODUCTION:</b> 1.1 Definition of irrigation 1.2 Types, sources and necessity of ir 1.3 History of development of irrigati National Water Policy	-	1	5	
UNIT - III	<ul> <li>2.0 RAIN FALL AND RUN OFF</li> <li>2.1 Definition of rainfall and run-off. C relationship, Dicken's and Ryve's f</li> <li>2.2 Concepts of Hydrograph and hyeto average rainfall by different method</li> <li>2.3 Computation of run-off and factors</li> <li>2.4 Types of rain gauges - Automatic a</li> </ul>	formulae graph, Computation of ds affecting run-off	4	10	

UNIT - III	3.0 WATER REQUIREMENT OF CROPS	5	15
	3.1 Definition of crop season	c	10
	3.2 Duty, Delta and Base Period, their relationship		
	3.3 Types of soil, soil fertility, crop rotation, season and names		
	of Kharif and Rabi crops		
	3.4 Definition- Gross command area, culturable command		
	area, Intensity of Irrigation, Irrigable area		
	3.5 Water requirement of different crops in Sikkim and their		
	classification according to season		
UNIT - IV	4.0 GROUND WATER AND WELLS:	3	6
	4.1 Ground water resources		
	4.2 Types of wells - shallow and deep well, aquifer types,		
	ground water flow, construction of open wells and tube-wells		
	4.3 Yield of an open tube-well and problems		
	4.4 Methods of lifting water - Manual and mechanical		
	Devices (names)		
UNIT - V	5.0 CANAL IRRIGATION:	10	6
	5.1 Classification of canals according to their alignment		
	5.2 Different parts of irrigation canals and their functions		
	5.3 Sketches of different canal cross-sections		
	5.5 Design of irrigation canals - Chezy's formula, Mannings		
	formula, Kennedy's and Lacey's silt theories and		
	equations, comparison of above two silt theories, critical		
	velocity ratio		
	5.6 Various types of canal lining - Advantages and		
	disadvantages		
UNIT - VI	6.0 DIVERSION HEAD WORKS	2	5
	6.1 Definition, necessity & objectives		
	6.2 Layout of a diversion head works and function of each		
	parts		
	6.3 Difference between weir and barrage		
UNIT - VII	7.0 REGULATORY AND CROSS DRAINAGE WORKS:	4	5
	7.1 Functions of regulatory works		
	7.2 Cross and head regulators		
	7.3 Definition- Canal falls, canal escapes, Energy dissipaters		
	7.4 Functions of the following types: aqueduct, siphon, super-		
	passage, level crossing, inlet and outlet		
	7.5 Constructional detail of the above		
UNIT - VIII	8.0 FLOOD CONTROL:	10	12
	8.1 Definition, cause and effects of flood		
	8.2 Flood control measures- Structural and non- structural		
	8.3 Flood forecasting- network and various methods		
	8.4 Dam: Classification: Earthen, masonry and concrete dams		
	8.5 Earthen dams - types, necessity, advantages of earthen		
	dams, materials used in construction, drainage problem,		
	causes of failure and protection against failures		
	8.6 Masonry and concrete dams: Forces acting on the dam, stresses developed at the base, solution of numerical		
	stresses developed at the base, solution of numerical problems		
	8.7 Labeled cross section of gravity dam and Spillways		
	10.7 Easter cross section of gravity dam and opiniways	1	1

	sagar, Hira 8.9 River t	of few important dams- Bhakra kund dam raining works- Objectives, differ s, groynes, pitching, revetment, r	rent types,			
UNIT - IX	<ul><li>9.1 Definit</li><li>9.2 Preven</li><li>9.2 Land d</li></ul>	<b>CR LOGGING AND DRAINAGE:</b> ion, causes and ill effects of water lodging. tive measures and remedies rainage- methods of drainage, surface and e drains and their layout				5
UNIT - X	10.1 Intra irrigation of 10.2 Tube influence, confined at 10.3 Type and slotted 10.4 Met assembly, installation	WELL IRRIGATION: oduction, advantages & disadvantages of tube well ver canal irrigation e-wells, explanation of terms water table, radius of depression head, cone of depression, ad unconfined aquifers es of tube-wells and their choice-cavity, strainer				6

project we drawing p and eleme some know visits" sho make then	The diploma-holders in Civil Engineering, m ork in design and drawing offices. The major lan and sections, collection of data, organizatio entary design of structures or their components wledge of actual practice in construction work. T ould therefore be very important to the diploma in professionally sound and valuable	works involve mak n and analysis of data They are also expec he course "Project an	ing survey, , estimation ted to have d Industria		
Course Ob	jective :-				
Module/Unit	After completion of the course, students will b	e able to:			
1.	Apply knowledge gained in different subjects t in Civil Engineering Apply he ideas of the state of art of construction pract		-		
2.	Apply the ideas of the state of art of const industrial visits				
3.	Develop self-confidence for working in Civil E	ingineering projects			
4	Prepare necessary drawings, estimates and proj	ect reports			
Pre-Requisit	e :-				
	Students should have entire knowledge of civil	engineering.			
Contents		Hrs	Marks		
UNIT- I	Selection of groups	3			
UNIT - II	Development of project topics and conduct rec survey	onnaissance 10			
UNIT - III	Collection of data, required survey work, Prepa synopsis and selection of project	aration of 15			
UNIT - IV	Management and construction procedure,	20			
UNIT – V	Scheduling of planning, Preparation of designi drawing in detail	ng and 25			
	Estimation of the project	20			

UNIT - VII	Execution of the project	30	
UNIT - VIII	- VIII Documentation and final presentation 27		
Total	otal 150 10		100
Practical :-			
S.No	Skills to be developed		
1	<ul> <li>Intellectual skills</li> <li>1) Decide and collect data for projects.</li> <li>2) Read and interpret the drawing, data.</li> <li>3) Design the components.</li> <li>4) Apply the principles rules regulations and byelaws.</li> </ul>		
2	<ul> <li>Motor skills-</li> <li>1) Plan for different phases of a task.</li> <li>2) Prepare drawings for project.</li> <li>3) Use of computer for drawing, networking.</li> <li>4) Work in a group for a given task.</li> </ul>		
3	<ol> <li>Social skills-</li> <li>Development of ethics.</li> <li>Will learn to work with peer as group.</li> <li>Able to keep safe and amicable working environment</li> </ol>

to carry out sur Course Objecti	vey work by using Total Station ve :-	nd management. It will also enable them	
-			
Course Objecti Module/Unit	ve :-	ents will be able to	
Course Objecti	ve :- After completion of the course, stude	ents will be able to eering department	
Course Objecti Module/Unit 1.0 2.	ve :- After completion of the course, stude Explain the organization of an engine	ents will be able to eering department es and execute them ing procedure during execution	
Course Objecti Module/Unit 1.0	ve :- After completion of the course, stude Explain the organization of an engine Classify work into different categorie Explain the various stages of account	ents will be able to eering department es and execute them ing procedure during execution t books and master roll	

	Contents (Theory)	Hrs	Marks
UNIT I	1.0 Organization of engineering department		
	1.1 Permanent establishment		
	1.2 Duties and responsibilities of subordinate engineers		
UNIT II	2.0 Works		
	2.1 Classification of work-original, major, minor, petty, repair		
	work, annual repair, special repair, quadrantal repair		
	2.2 Method of execution of works through the contractors,		
	departmentally, contract and agreement, work order.		
UNIT III	3.0 Account of works		
	3.1 Explanation of various terms		
	Administrative approval, technical sanction, contingency		
	budget, tender, preparation of notice inviting tender, receiving		
	of quotations, earnest money, security deposit, advance		
	payment, on account payment, intermediate payment, final		
	payment, running bill, final, regular and temporary		
	establishment, cash, major & subhead of account, temporary		
	advance, issue rate, storage, supervision charges, suspense		
	account, debit, credit, book transfer, sub-voucher and related		
	accounts vouchers		
	3.2 Measurement book use & maintenance, procedure of making		
	entries of measurement of work and supply of materials,		
	labour employed, standard measurement books and common		

UNIT IV	<ul> <li>irregularity 3.3Muster Roll: Its preparation &amp; use for pay and wages</li> <li>4.0 TOTAL STATION AND ITS APPLICATION</li> <li>4.1 Use of total station-</li> <li>4.2 Control survey, topographic survey, Land, Boundary or cadastral survey, Route survey.</li> </ul>	30	
	<ul> <li>4.3 Detail Survey and Profile Levelling; Calculation of Area and Volume</li> <li>4.4 Engineering Surveys: Setting out of Curves – Horizontal: Simple, Compound, Reverse and Transition, Vertical</li> </ul>	50	
UNIT V	<ul> <li>5.0 AERIAL SURVEY AND REMOTE SENSING &amp; GIS</li> <li>5.1 Aerial Survey Introductions, definition, Aerial photograph</li> <li>5.2 Remote Sensing – Introduction, Electro-Magnetic Energy, Remote sensing system-Passive system, Active system, Applications – mineral, land use / Land cover, Natural Hazards and Environmental engineering system.</li> </ul>		
	TOTAL:	60	50

Pract	Practical :-		
S.No	Skills to be developed		
1.	Intellectual skills- Labour management and capacity to execute work		
2.	Motor skills- 2. Handing Total Station for conducting Survey		
3	<ul> <li>Social skills-</li> <li>1. Will learn to work with peer as group</li> <li>2. Able to communicate with teachers and peers to clarify doubts.</li> </ul>
